

## Java Academy

Dreamix was founded 20 years ago by passionate IT students, who wanted to create the dreamiest workplace where everyone is heard, works under transparent management, and lives up to their full potential. Now, many years later, we deliver software solutions for renowned companies from Germany, the UK, Switzerland, and Silicon Valley. Dreamix provides quality software services and products for top enterprises around the world through Java and Web technologies.

We believe the employer-employee relationship must be in the form of a partnership, not a transaction. You can be sure that we'll invest as much as we can in your development, but we expect the same commitment to Dreamix. Our culture is defined by our actions not by what we say.

Currently, we have the pleasure to announce the start of the second edition of our **Java Academy** in Plovdiv.

Are you ready to take the first steps towards building a successful career? Look no further! Dreamix's training is offering an exciting opportunity that will provide you with valuable hands-on experience in Java development.

The topics have been strategically selected for you to get familiar with Spring, Spring Boot, JPA, Spring Data JPA, Angular, REST, Junit, Mockito, Maven and Git. We understand that a fulfilling training is about growth and learning. That's why we offer a supportive environment where you'll receive guidance and mentorship from experienced professionals. We encourage curiosity and innovation, and we're committed to helping you expand your skill set, broaden your perspectives, and unleash your full potential.

**Start of the training:** 01 July, 2026

**Duration of the training:** 2 months

**Schedule:** Monday to Friday from 09:00 h until 18:00 h (with possibility of flexible working hours)

**Location:** Kamenitza Office Park, Plovdiv (with the option to join remotely up to 50% of the time)

### **Application & Requirements:**

The training is perfect for you if you have some basic knowledge in software development and have interest in Java.

After you send us your application, you will be invited to take a test in person and according to your score, you will be invited to an interview. Based on the results, we will select the 5 students we believe will benefit the most from the training. At the end you will have successfully created an app and you might be offered a position as a Junior Java Engineer at Dreamix.

**Don't miss this chance to gain practical knowledge, build a strong professional network, and make lasting memories. Apply today to secure your spot and embark on a rewarding training adventure with us!**

**If you are interested in this opportunity, apply before the 5th of June, 2026.**

All applications will be treated strictly confidential.

Thank you for applying!
